Special precaution (Very important):

- 1. All IO ports used need a series resistance of 100 Ω to 1K Ω The resistance value should be as large as possible without affecting the signal function
- 2. All IO ports and power ports used shall be protected by ESD diodes
- 3. The rated voltage of RST and bank6 / 7 is 1.8V. These pins cannot bear a voltage greater than 1.8V

Core System

Note:

BOOT(IO16) pull low to enter ISP mode, download from IO4,5 SPI3 Support XIP SPI0/1/3 for Master, SPI2 for slave 3.3V IO speed 80M, 1.8V IO speed 208M. Simple test PWM is faster than 300MHz.
